Summary

Senior Full Stack Engineer with 12+ years of experience building high-scale SaaS, fintech, e-commerce, and AI-agent product surfaces. Specialized in React, TypeScript, Node.js, cloud-native architectures, and modern AI-assisted development workflows. Proven track record of improving performance, scaling platforms, and delivering business-critical systems for companies ranging from startups to enterprise organizations.

Technical skills

- Frontend & Platform: React, Next.js, TypeScript, JavaScript, Redux Toolkit, Angular, Preact, React Native, Design Systems, Frontend Architecture, Webpack Module Federation, Jest
- Backend & Data: Node.js, Express, REST APIs, API design, PostgreSQL, MongoDB, DynamoDB
- Cloud & DevOps: AWS, Lambda, Docker, Kubernetes, GitLab CI, Jenkins, Traefik, CI/CD
- AI & Developer Productivity: AI-agent workflows, AI-assisted development, Claude Code, Codex, integration automation

Experience

Nov 2024 - present, Senior Full Stack Engineer, Tolstoy, Tel Aviv-Yafo, Israel

- Built frontend and backend features for gotolstoy.com using React, TypeScript, AWS Lambda, DynamoDB, and PostgreSQL, improving scalability and maintainability of core SaaS product surfaces.
- Designed AI-agent capabilities in Tolstoy AI Studio to automate creation and maintenance of 40+ third-party integrations, accelerating connector delivery while keeping engineers in control of review and quality.
- Created reusable design-system components and shared UI infrastructure that improved product consistency and enabled AI-assisted interface generation across React and TypeScript workflows.

Feb 2024 - Nov 2024, Senior Full Stack Developer, Bright Data, Netanya, Israel

- Led development of Toolip.io, a SaaS proxy management platform built with React and TypeScript, reducing page load times by 25%.
- Designed and integrated end-to-end payments workflows using Stripe, PayPal, and BlueSnap across React/Node.js services, reducing payment-related errors by 10%.
- Improved customer-facing workflows on Bright Data's platform, increasing conversion rates by 20% and reducing support requests by 15%.

July 2022 - Feb 2024, Senior Full Stack Developer, Tenengroup, Tel Aviv-Yafo, Israel

- Led a modern React shopping-cart experience for Myka and Oak & Luna, improving checkout efficiency and reducing cart abandonment by 20%.
- Architected a scalable Next.js data-access and API layer, reducing response times by 30% for a high-traffic e-commerce platform.
- Partnered with backend .NET teams to improve integration patterns, development velocity, and cross-team delivery.

Feb 2021 - July 2022, Chief Frontend Developer, Luxoft, Moscow, Russia

- Led a micro-frontend migration with Webpack Module Federation, enabling partial deployments, 100% client infrastructure compatibility, and 50% faster delivery.
- Built a financial reporting module for VTB Bank using React, Redux Toolkit, Redux Saga, and TypeScript, improving data accuracy by 30% and UI consistency.

2010 - 2021, Earlier Engineering Experience, Mail.Ru Group, Yandex, Idea Platform, Systematica, Allied Testing

- Built payment interfaces, frontend CI pipelines, and test environments at Mail.Ru Group using Preact, Redux, TypeScript, GitLab CI, Docker, and Traefik; improved payment speed by 20% and shortened feedback cycles by 30%.
- Modernized Yandex.Disk UI architecture with React, Redux, and ES6; improved load time by 20%, added React Native notification embedding, and increased Jest test coverage by 15%.
- Delivered full-stack web, mobile, backend, and QA foundations across earlier roles using AngularJS, NativeScript, JavaEE, JAX-RS, and testing practices.

Education

2004 - 2009, Lomonosov Moscow State University, Faculty of Computational Mathematics and Cybernetics, Bachelor's degree
Specialization: Applied mathematics and computer science
